Insert the email address and the password you created in the registration phase in order to be able to login.

Distributing Your Exam

MyVue offers you several possible ways to distribute your exam data. You may share your exam with others, save the exam data and then distribute it, and print the report to be read from a hard copy.

Sharing Exam Data

You may want to share your exam information with another person (physician or non-physician). The person with whom you share the exam receives an invitation email, providing access to your exam information.

1. Click the **Share Exam** icon at the bottom left area of the page. The **Share Exam** page appears.
2. Enter the email address of the person with whom you are sharing the exam.
3. Click the **Security Implications** link and select the check box to express your familiarity and agreement with the security implications of sharing medical information.
4. Click the **Sharing Options** double arrow to display sharing options and select the desired ones.

Share Exam

Search user by name OR enter an email address (do not do both):

Name:

Or

Email address:

Enter mobile number:

Mobile number:

Sharing options

Define sharing options:

Allow access to the exam for the next days

Share entire patient portfolio

Allow user to share exam with additional users

Hide patient details

I understand the security implications of sharing medical information.

Cancel

You can determine the following parameters –

Number of days for which access is allowed. The maximum number of days is configured in the Vue Motion system.

Whether all available studies of the patient are shared or only the one currently being viewed.

Whether the person with whom the study is shared is allowed to further share the exam.

Whether the patient's personal details are masked in the study when viewed by the person with whom the study is shared.

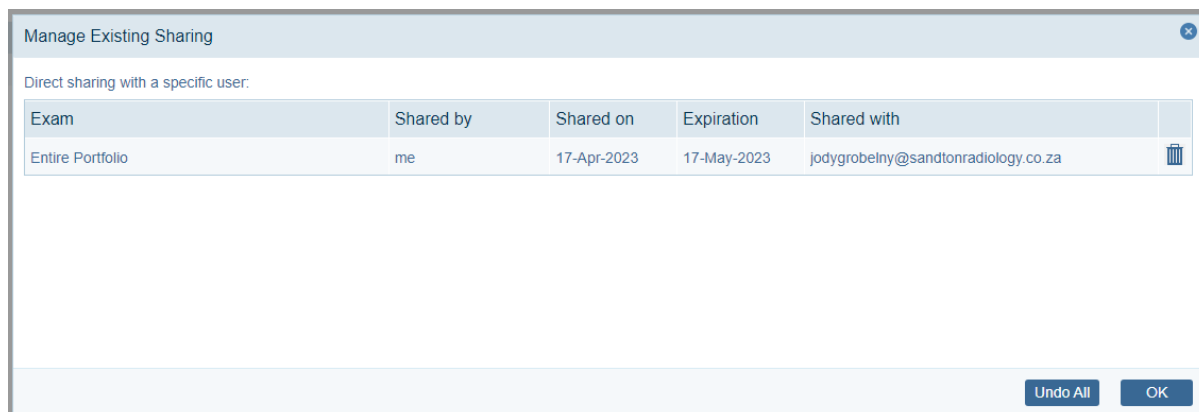

5. Click **Share**. The **Share Exam** page appears with the access URL.

Managing Shared Exam

You may cancel the sharing of your exam with specific or all people with whom you shared the exam data in the past.

1. Display the Manage Existing Sharing page by doing the following:
 - A. On the **Search Results** page, right-click the patient whose exam you would like to handle.

B. From the context-sensitive menu, select **Manage existing sharing...** The **Manage Existing Sharing** page opens, listing all the Share actions that were performed on the exam.

2. Click the  icon to the right of each of the rows you wish to cancel. Click **Undo All** to undo all existing sharing instances.

Saving the Exam

Click the  at the top right area of the page to save the images of your exam locally. A ZIP file is created, containing the exam files (DICOMDIR and JPEG files). You can then burn the files on a CD, send them by email, or distribute them in any other way.

Printing the Report

Click the  at the top right area of the page to print a copy of the exam's report.

Viewing Previous Exams

Click the **Patient History** bar at the left side of the screen of the page to view a list of all your previous exams.
